VOL. I—20 (1934—1956)

THE JOURNAL
OF THE
INDIAN MATHEMATICAL SOCIETY
(NEW SERIES) VOLS: 1—20 (1934–1956).

INDEX.

Ahmad, Mansoor : On exceptional values of entire functions of infinite order, **18**, (1954), 19-21.

Ananda Rau, K. : On certain infinite series for doubly periodic functions, **19**, (1955), 95-103.

Auluck, F.C. : An asymptotic formula for $p_k(n)$, **6**, (1942), 113-114.

And CHOWLA, S. : Some properties of a function considered by Ramanujan, **4**, (1940), 169-173.

CHOWLA, S and HANSRAJ GUPTA : On the maximum value of the number of partitions of n into k parts, **6**, (1942), 105-112.

Avadhani, T.V. : On summation over lattice points, **16**, (1952), 103-125.

On the summability of eigenfunction expansions, **18**, (1954), 9-18.

Ayyar, M. Venkatarama : *See* under VENKATARAMA AYYAR, M.

Bagchi, Haridas. : The method of difference equations applied to summation of certain series involving Legendre and Bessel functions, **4**, (1940), 13-24.

A note on cyclides, **4**, (1940), 120-124.

On bicircular quartics, **5**, (1941), 46-47.

Note on critic centres and coincidence points of cubic curves, **13**, (1949), 73-75.

And CHAKRAVARTY, N.K. : On Tschebyscheff's function $T_n(z)$ and its associated equations, **14**, (1950), 35-42.

Some further relations connected with Tschebyscheff's function $T_n(z)$, **14**, (1950), 43-46.

And CHATTERJEE, P.C. : Linear difference equations asscociated with certain special functions, **16**, (1952) 37-40.

Balachandran, V.K. : Minimal bicompact space, **12**, (1948), 47-48.

Ideals of the distributive lattice, **12**, (1948), 49-56.

Prime ideals and the theory of last-residue classes, **13**, (1949), 31-40.

The Chinese reminder theorem for the distributive lattice, **13**, (1949), 76-80.

Balagangadharan, K. : A quasi-Tauberian theorem on Fourier series, **16**, (1952), 183-190.

Ballabh, Ram : *See* under RAM BALLABH.

Bambah, R.P. and ROTH, K.F. : A note on lattice coverings, **16**, (1952), 7-12.

Banerjee, D.P. : On the zeros of Bessel functions, **1**, (1934-35), 266-268.

A note on the zeros of parabolic cylinder functions of the second kind, **2**, (1936-37), 51-52.

A further note on the zeros of Bessel functions, **2**, (1936-37), 211-212.

On the expansion of a function in a series of $q_n(z)$, **3**, (1938-39), 161-168.

On some new integral relations between Bessel and Legendre functions of unrestricted degree, **4**, (1940), 25-28.

Basava Raju, N. : On certain symmetric functions of numbers prime to m, **2**, (1936-37), 308-313.

Bateman, P.T. and CHOWLA, S. : The equivalence of two conjectures in the theory of numbers, **17**, (1953), 177-181.

Behari, Ram : *See* under RAM BNHARI.

Bell, Clifford : Plane curves with pseudo-Rhamphoid cusps, **3**, (1938-39), 193-197.

Bell, E.T. : Note on denumerants, **3**, (1938-39), 41-45.

Bhimasena Rao, M. and VENKATARAMA AYYAR, M. : Types of solutions of $x^3+y^3+z^3=1$ in integers, **4**, (1940), 47-70.

Biswas, B.N. : Statistics of photons and Planck's radiation formula, **3**, (1938-39), 82-86.

Boas, R.P. (Jr.) : Polynomial expansion of analytic functions, **14**, (1950), 1-14.
Differential equations of infinite order, **14**, (1950), 15-20.
Inequalities between series and integrals involving entire functions, **16**, (1952), 127-135.

Bochner, S. : On compact complex manifolds, **11**, (1947), 1-21.
Remarks on Gaussian sums and Tauberian theorems, **15**, (1951), 97-104.
Algebraic and linear dependence of automorphic functions in several variables, **16**, (1952), 1-6.
Connection between functional equations and modular relations and functions of exponential type, **16**, (1952), 99-102.
And MARTIN, W.T. : Hartog's theorem in complex spaces with singularities, **16**, (1952), 137-146.

Bose, B.N. : On some transformations in generalised hypergeometric series, **8**, (1944), 119-128.

Bose, R.C. : Two theorems on the convex oval, **2**, (1936-37), 13-15.
A theorem on equi-angular convex polygons circumscribing a convex curve, **2**, (1936-37), 96-98.
Analogue of a theorem of Blaschke, **2**, (1936-37), 165-166.
An affine analogue of Singer's theorem, **6**, (1942), 1-15.

Bose, S.K. : On the derivatives of integral functions, **10**, (1946), 77-80.
Certain properties of the generalised Laplace transform, **14**, (1950), 29-34.

Brij Mohan, (Mehrotra) : A list of self-reciprocal functions, **1**, (1934-35), 93-104.
Some self-reciprocal functions, **1**, (1934-35), 133-134.
A brief history of self-reciprocal functions, **1**, (1934-35), 208-227.
Self-reciprocal functions involving Laguerre polynomials, **3**, (1938-39), 268-270.
Self-reciprocal functions involving Appel's function **5**, (1941), 32-37.
Some infinite integrals, **5**, (1941), 123-127.
A class of infinite integrals—II., **6**, (1942), 98-101.
And SHASTRY, R.V. : A few self-reciprocal functions, **2**, (1936-37), 220-221.
An inversion formula, **3**, (1938-39), 46-48.

Buck, R.C. : Extensions of homomorphisms and regular ideals,. **14**, (1950), 156-158.
On the distribution of the zeros of an entire function, **16**, (1952), 147-149.

Carlitz, L. : A theorem of congruences, **17**, (1953), 43-45.

Chakrabarti, Satis Chandra : On a few recurrants, **5**, (1941), 18-26.

Some further algebraic identities, **8**, (1944), 115-119.
Some identities and recurrants, **11**, (1947), 89-94.

Chakravarti, N.K. and BAGCHI, H. : On Tschebyscheff's function $T_n(z)$ and its associated equations, **14**, (1950), 35-42.
Some further relations connected with Tschebyscheff's functions $T_n(z)$, **14**, (1950), 43-46.

Chandrasekharan, K. : On Hadamard's factorisation theorem, **5**, (1941), 128-132.
The second theorem of consistency for absolutely summable series, **6**, (1942), 168-180.
The absolute summability of series of eigenfunctions, **7**, (1943), 25-30.
Bessel summability of the product of two series, **7**, (1943), 31-35.
On Strum-Louville series, **8**, (1944), 109-114.
S. S. Pillai, **15**, (1951), 1-10.
And Minakshisundaram, S. : A note on typical means, **18**, (1954), 107-114.

Chariar, V.R. : On the harmonic transversals of two pairs of quadrics and a straight line, **9**, (1945) 46-50.
On a certain scroll associated with a net of quardrices **9**, (1945), 105-108.
And SINGH, B. : On a certain rectilinear congruence, **13**, (1949), 148-151.

Chatterjee, P.C. and BAGCHI, H.D. : Linear difference equations associated with certain special functions, **16**, (1952), 37-40.

Chen Yung Ming : A remark on non-integrable conjugate functions, **20**, (1956), 107-114.

Cherian, K.C. : A bivariate correlated gamma type distribution function, **5**, (1941), 133-144.

Chern, Singh-Shern. : On a theorem of algebra and its geometrical applications **8**, (1944), 29-36.

Chaudhury, A.C. : On Steiner's polygons in a web, **6**, (1942), 122-126.
On 2-Webs of curves in R_n, **8**, (1944), 36-44.

Chowla, S. : On the least prime in an arithmetical progression, **1**, (1934-35), 1-3.
On abundant numbers, **1**, (1934-35), 41-44.
Heilbronn's class-number theorem, **1**, (1934-35), 66-68.
An extension of Heilbronn's class-number theorem, **1**, (1934-35), 88-92.
On difference sets, **9**, (1945), 28-31.
And AULUCK, F.C. : Some properties of a function considered by Ramanujan, **4**, (1940), 169-173.
AULUCK, F.C. and HANSRAJ GUPTA : On the maximum value of the number of partitions of n into k parts, **6**, (1942), 105-112.
And BATEMAN, P.T. : The equivalence of two conjectures in the theory of numbers, **17**, (1953), 177-181.
And ERDOS, P. : A theorem on the distribution of the values of L-functions, **15**, (1951), 11-18.

And MIAN, A.M. : The differential equations satisfied by certain functions, **8**, (1944), 27-28.

And VIJAYARAGHAVAN, T. : On the largest prime divisor of numbers, **11**. (1947), 31-37.

Coddington, E.A. and LEVINSON, N. : Uniqueness and the convergence of successive approximation, **16**, (1952), 75-81.

Cowling, V.F. : On Taylor methods of summation, **20**, (1956), 299-306.

And THRON, W.J. : Zero-free regions of polynomials, **20**, (1956), 307-310.

Davenport, H. and ERDOS, P. : On sequences of positive integers, **15**, (1951), 19-24.

Davis, P. : Some theorems for infinite systems of linear equations, **14**, (1950), 139-155.

de Bruijn, N.G. : The asymptotic behaviour of a function occurring in the theory of primes, **15**, (1951), 25-32.

On some multiple integrals involving determinants, **19**, (1955), 133-151.

Deuring, M. : The Zeta-functions of algebraic curves and varieties, **20**, (1956), 89-101.

Dhar, S.C. : Note on the addition theorem of parabolic cylinder functions, **4**, (1940), 29-30.

On certain self-reciprocal functions, **4**, (1940), 91-96.

Integral representations of Whittaker and Webber functions, **6**, (1942), 181-185.

Dieudonne, J. : Sur le theoreme de Lebesgue-Nikodym.—IV, **15**, (1951), 77-86.

Dinesh Chandra : On the Hankel transformation of generalised hypergeometric functions, **16**, (1952), 41-45.

Eichler, Martin. : On the class number of imaginary quadratic fields and the sums of divisors of natural numbers, **19**, (1955), 153-180.

Modular correspondences and their representations, **20**, (1956), 163-206.

Ellis, D. : On the metric characterization of metric lattices, **15**, (1951), 152-54.

Erdelyi, A. : Infinite integrals involving Whittaker functions, **3**, (1938-39), 169-181.

Erdös, P. : On arithmetical properties of Lambert series, **12**, (1948), 63-66.

Some remarks on diophantine approximations, **12**, (1948), 67-74.

Some asymptotic formulas in number theory, **12**, (1948), 75-78.

On a Tauberian theorem connected with the new proof of the prime number theorem, **13**, (1949), 131-147.

And CHOWLA, S. : A theorem on the distribution of the values of *L*-functions, **15**, (1954), 11-18.

And DAVENPORT, H. : On sequences of positive integers, **15**, (1954), 19-24.

Fort, M.K. (**Jr.**) : Open topological disks in the plane, **18**, (1954), 23-26.

Ganapathy Iyer, V. : Rearrangement of complex series, **1**, (1934-35), 8-22.

Tauberian theorems on generalised Lambert's series, **1**, (1934-35), 73-87.

A note on the values of an analytic function near an essential singularity, **1**, (1934-35), 247-250.

On integral functions of order one and of finite type, **2**, (1936-37), 1-12.
On integral functions of finite order bounded at a sequence of points, **2**, (1936-37), 53-66.
On integral functions of finite order and minimal type, **2**, (1936-37), 131-140.
On summation processes in general, **2**, (1936-37), 222-238.
A property of the zeros of the successive derivatives of integral functions, **2**, (1936-37), 289-294.
Some uniqueness theorems for the class *Lp*, **2**, (1936-37), 324-331.
On the average radial increase of a certain class of integral functions of order one and fiinte type, **3**, (1938-39), 87-95.
On certain functional equations, **3**, (1938-39), 312-315.
On maximal integral functions, **4**, (1940), 97-115.
On periodic integral functions, **5**, (1941), 1-17.
A property of the maximum modulus of integral functions, **6**, (1942), 69-80.
The influence of zeros on the magnitude of functions regular in an angle, **7**, (1943), 1-16.
On singular functions, **8**, (1944), 94-108.
On the translation numbers of integral functions, **10**, (1946), 17-28.
On the space of integral functions—I, **12**, (1948), 13-30.
A note on the linear space generated by a sequence of inetgral functions, **17**, (1953), 183-185.
On a functional equation, **20**, (1956), 283-290.

Gupta, Hansraj : *See* under HANSRAJ GUPTA.

Gupta, H.C. : Operational calculus and Hankel transformations, **7**, (1943), 117-128.
A theorem on operational calculus, **9**, (1945), 61-65.
Two theorems on self-reciprocal functions, **9**, (1945), 66-68.

Halmos, Paul R. : Functions of integrable functions, **11**, (1947), 81-84.

Hansraj Gupta : Waring's problem for powers of primes, **3**, (1938-39), 136-145.
Note on Dirichlet's *L*-functions, **3**, (1938-39), 198-199.
Waring's problem for powers of primes—II, **4**, (1940), 71-79.
Some properties of generalised combinatory functions, **5**, (1941), 22-31
On numbers of the form $4^a(8b+7)$, **5**, (1941), 192-202.
A formula in partitions, **6**, (1942), 115-117.
A formula for $L(n)$, **7**, (1943), 68-71.
On the maximum values of $p_k(n)$ and $\pi_k(n)$, **7**, (1943), 72-75.
A congruence relation between $T(n)$, and $\sigma(n)$, **9**, (1945), 59-60.
A note on the parity of $p(n)$, **10**, (1946), 32-33.
An asymptotic formula in partitions, **10**, (1946) 73-76.
On a conjecture of Miller, **13**, (1949), 85-90.
AULUCK, F.C. and CHOWLA, S. : On the maximum value of the number of partitions of n into k parts, **6**, (1942), 105-112.

Hari Shanker. : On the expansion of the parabolic cylinder function in a series of the product of two parabolic cylinder functions, **3**, (1938-39), 226-230

On integral representations of Weber's parabolic cylinder function and its expansion into infinite series, **4**, (1940), 34-38.
On certain integrals and expansions involving Weber's parabolic cylinder functions, **4**, (1940), 158-166.
A note on certain self-reciprocal functions, **5**, (1941), 44-45.
On functions which are Hankel transforms of each other, **5**, (1941), 109-112.
On confluent hypergeomoetric functions which are Hankel transforms of each other, **7**, (1943), 63-67.
Some infinite integrals involving cylinder functions, **8**, (1944), 57-60.
On integral representation for Whittaker functions, **9**, (1945), 42-46.
Parabolic cylinder functions which are Hankel transforms of each other, **10**, (1946), 62-64.

Henriksen, M. : On rings of entire functions of finite order, **17**, (1953), 59-61.

Hua, Loo Keng. : On Waring's problem with cubic polynomial summands, **4**, (1940), 127-135.

Ishaq, M. and SHAH, S.M. : On the maximum modulus and the coefficients of an entire series, **16**, (1952), 177-182.

Iyengar, A. A. Krishnaswami : *See* under KRISHNASWAMI IYENGAR, A. A.

Iyengar, K. S. K. : On a test for the completeness (L^2) of a normal orthogonal set and its applications, **4**, (1940), 1-12.
On Frullani's integrals, **4**, (1940), 145-150.

Iyer, V. Ganapathy : *See* under GANAPATHY IYER, V.

Kaplansky, Irving. : Regular Banach algebras, **12**, (1948), 57-62.

Kesava Menon, P. : A theorem on congruence, **2**, (1936-37), 332-333.
A generalisation of Legendre functions, **5**, (1941), 92-102.
Multiplicative functions which are functions of the g.c.d. and l.c.m. of the arguments, **6**, (1942), 137-142.
Transformations of arithmetic functions, **6**, (1942), 143-152.
Identities in multiplicative functions, **7**, (1943), 58-62.
Some generalisations of the divisor function, **9**, (1945), 32-36.
A generalisation of Wilson's theorem, **9**, (1945), 79-88.
On the transformation of the products of ϑ-functions, **9**, (1945), 93-105.
On Gauss's sums, **16**, (1952), 31-36.

Kibble, W.F. : A Bessel function in terms of incomplete gamma functions, **3**, (1938-39), 271-294.

Koksma, J.F. : A Diophantine property of some summable functions, **15**, (1951), 87-96.

Kosambi, D.D. : Collineations in path-space, **1**, (1934-35), 69-72.
Differential geometry of the Laplace equation **2**, (1936-37), 141-143.
The tensor analysis of partial differential equations, **3**, (1938-39), 249-253.
The concept of isoptropy in generalised path-spaces, 4, (1940), 80-88.
Path equations admitting the Lorentz group—II, **5**, (1941), 62-72.
On the zeros and closure of orthogonal functions, **6**, (1942), 16-24.
Statistics in function space, **7**, (1943), 76-88.

Krishnamurti, S.B. : A set of axioms for topological algebra, **4**, (1940), 116-119.

Krishnan, K.S. : On the equivalence of certain infiinite series and the corresponding integrals, **12**, (1948), 79-88.

Krishnan, V.S. : A weak homeomorphism between topological spaces and characterisation of completely regular spaces, **10**, (1946), 37-56.

Extensions of partially ordered sets : I General theory, **11**, (1947), 49-68.

Extensions of partially ordered sets : II Construction, **12**, (1948), 89-106.

Extension of multiplicative systems and modular lattices, **13**, (1949), 49-59.

Krishnaswami Iyengar, A.A. : A general formula for the moments of hypergeometrical series, **1**, (1934-35), 109-114.

On the semi-invariants of two variants and their additive property, **3**, (1938-39). 1-7.

Lakshminarasimhan, T. V. : A Tauberian theorem for the type of an entire function, **17**, (1953), 55-58.

Langebartel, R.G. : The convolutions of the kernel $x^{\lambda}-t^{\lambda}$, **15**, (1951), 118-128.

Levi, F.W. : On a fundamental theorem of geometry, **3**, (1938-39), 182-192.

Pairs of inverse modulus, **3**, (1938-39), 295-306.

Remarks on Mr. V. Narasimha Murthi's paper : " On a problem of arrangements (I) ", **4**, (1940), 45-46.

The commutator group of a free product, **4**, (1940), 136-144.

On the number of generators of a free product and a lemma of Alexander, Kurosch, **5**, (1941), 149-155.

Groups in which the commutator operation satisfies certain algebraic conditions, **6**, (1942), 87-97.

Notes on group theory, I, II, **8**, (1944), 1-9.

Notes on group theory, III, **8**, (1944), 45-56.

Notes on group theory, IV-VI, **8**, (1944), 78-91.

Notes on group theory, VII, **9**, (1945), 37-42.

The ring of endomorphisms for which every sub-group of an Abelian group is invariant, **10**, (1946), 29-31.

On skew fields of a given degree, **11**, (1947), 85-88.

On Helly's theorem and the axioms of convexity, **15**, (1951), 65-76.

Levin, V. : Two remarks on Hilbert's double series theorem, **2**, (1936-37), 111-115.

Levinson, N. and CODDINGTON, E. A. Uniqueness and the convergence of successive approximations, **16**, (1952), 75-81.

Linnik, Y. V. : An application of the theory of matrices and of Lobatschevskian geometry to the theory of Dirichlet's real characters, **20**, (1956), 37-44.

Mass, Hans. : Die bestimmung der Dirichletreihen mit Grossencharakteren zu den modulformen n-ten grades, **19**, (1955), 1-23.

Spherical functions and quadratic forms, **20**, (1956), 117-162.

MacNerney, J. S. : Half-bound matrices, **16**, (1952), 151-176.

Mahler, K. On the generating function of the integers with a missing digit, **15**, (1951), 33-40.

Majumdar, N. : On the parity of the partitive function, $p(n)$, **13**, (1949), 23-24.

Martin, W.T. and BOCHNER, S. : Hartog's theorem in complex spaces with singularities, **16**, (1952), 137-146.

Masani, P. and VIJAYARAGHAVAN, T. : An analogue of Laurent's theorem for a simply connected region, **16**, (1952), 25-30.

Mehrotra, Brij Mohan : *See* under BRIJ MOHAN (MEHROTRA).

Menon, C. P. S. : The number of particles in the path of a ray of light traversing the earth's atmosphere, **1**, (1934-35), 165-178.

Menon, P. Kesava : *See* under KESAVA MENON, P.

Mian, A. M. and CHOWLA, S. : The differential equations satisfied by certain functions, **8**, (1944), 27-28.

Minakshisundaram, S. : Tauberin theorems on Dirichlet's series, **2**, (1936-37), 147-155.

On the extension of a theorem of Caratheodory in the theory of Fourier series, **2**, (1936-37), 314-320.

The Fourier series of a sequence of functions, **2**, (1936-37), 321-323.

A Tauberian theorem on (λ, k) process of summation, **3**, (1938-39), 127-130.

On V. Ramaswami's Tauberian theorem on oscilliation, **3**, (1938-39), 131-135.

On the theory of non-linear partial differential equations of the parabolic type, **3**, (1938-39), 237-247.

On the roots of a continuous non-differentiable function, **4**, (1940), 31-33.

On the expansion of an arbitrary function in a series of eigenfunctions of boundary value problems, II, **5**, (1941), 103-108.

Studies in Fourier Ansatz and parabolic equations, **6**, (1942), 41-50.

On expansion in eigenfunctions of boundary value problems, III, **6**, (1942), 153-167.

On expansion in eigenfunctions of boundary value problems IV, 7, (1943), 17-22.

On expansion in eigenfunctions of boundary value problems, V, 7, (1943), 89-85.

Fourier Ansatz and non-linear parabolic equations, **7**, (1943), 129-142.

On the differentiated series of eigenfunctions, **8**, (1944), 75-78.

Zeta functions on the sphere, **13**, (1949), 41-48.

Eigenfunctions on Riemannian manifolds, **17**, (1953), 159-165.

On the structure of unitary symplectic groups, **19**, (1955), 105-120.

And CHANDRASEKHARAN, K. : A note on typical means, **18**, (1954), 107-114.

Mirsky, L. : A property of square-free integrals, **13**, (1949), 1-3.

Mishra, R. S. : The five families of ruled surfaces through a line of a rectilinear congruence, **10**, (1946), 68-72.

Five families of ruled surfaces through a line of a rectilinear congruence, **13**, (1949), 81-84.

Ratio of the distance to the central point and the parameter of distribution in a line congruence, **14**, (1950), 171-173.

Five families of ruled surfaces through a line of a rectilinear congruence, III, **16**, (1952), 55-62.

Mital, P. C. : Operational images of self-reciprocal functions, **6**, (1942), 25-32.

Mitra, S. C. : On a certain polynomial analogous to Lommel's polynomial, **1**, (1934-35), 4-7.

On the product of parabolic cylinder functions, **1**, (1934-35), 105-108.

On an extension of a theorem of Watson in generalised hypergeometric series, **6**, (1942), 81-83.

On a certain transformation about generalised hypergeometric series, **6**, (1942), 84-86.

On certain transformations in generalized hypergeometric series, **7**, (1943), 102-110.

On a method of summing diverging series, **13**, (1949), 4-16.

On the sum of a series analogous to Fourier series, **13**, (1949), 159-164.

Moghe, D. N. : On the principle of conservation of energy in the relativistic theory of gravitation, **3**, (1938-39), 231-236.

Mohammad, Shabbar. : One parameter groups of deformations in Riemannian spaces, **6**, (1942), 186-191.

Mohan, Brij. : *See* under Brij Mohan.

Mohanty, Ramnath: The summation of the integral conjugate to the Fourier integral of the finite type and of the conjugate series, **3**, (1938-39), 319-329.

Mordell, L. J. : Lattice points in a tetrahedron and generalised Dedekind sums, **15**, (1951), 41-46.

Morse, M. and TRANSUE, W. : A calculus for Frechet variations, **14**, (1950), 65-117.

Murthi, V. NARASIMHA : *See* under NARASIMHA MURTHI, V.

Murti, A. S. N. : Simply ordered spaces, **13**, (1949), 152-158.

Mutatker, V. L. : On some expansions and integrals involving the parabolic cylinder functions, **1**, (1934-35), 53-58.

Nagabhushanam, K. : An application of a theorem of Lie and Koenigs to the equations of motion **2**, (1936-37), 123-124.

Projective transformations and the Hamiltonian, **2**, (1936-37), 156-158.

On a property of the Lagrangian, **4**, (1940), 89-90.

A generalisation of the theorem of Virial, **12**, (1948), 117-120.

Narasimha Murthi, V. : On a problem of arrangements, I, **4**, (1940), 39-43.

On Waring's problem for 8th, 9th and 10th powers, **5**, (1941), 122.

Narasimham, M. S. : The problem of limits on a Riemannian manifold, **20**, (1956), 291-297.

Narasinga Rao, A. : Studies in Turbine geometry, I, **3**, (1938-39), 96-108.

Neville, E. H. : Bipolar and trigonometrical coordinates on a line, **2**, (1936-37), 173-185.

Oblath, R. : Eine-bemerkung uber Produkte aufeinander Folgender Zahlen, **15**, (1951), 135-139.

Padma, N. : On the duality of linear tensors in affine space, **12**, (1948), 107-116.

Skew tensors and region-complexes in S_n, **13**, (1949), 91-104.

Linear tensors and region-complexes, **19**, (1955), 73-93.

Padmavalli, K. : A characterisation of minimally bicompact spaces, **16**, (1952), 63-68.

On the Cesaro summability of a class of functions, **17**, (1953), 151-158.
A characterisation of minimally bicompact space : corrections and additions, **17**, (1953), 143-149.

Pankajam, Miss S. : On the arithmetico-logical principle of duality, **1**, (1934-35), 269-275.
On Euler's ϕ function and its extensions, **2**, (1936-37), 67-75.
On symmetric functions of n elements in a Boolean algebra, **2**, (1936-37), 198-210.
On the formal structure of the propositional calculus, I, **5**, (1941), 49-61.
On the formal structure of the propositional caculus II, **6**, (1942), 51-64.
Postscript, **6**, (1942), 102.

Parameswaran, M. R. : On the reciprocal of a K-matrix, **20**, (1956), 329-331.

Pasricha, B. R. : Some infinite integrals involving Whittaker functions, **7**, (1943), 46-50.

Pillai, S. S. : On Waring's problem, **2**, (1936-37), 16-44.
On sets of square-free numbers, **2**, (1936-37), 116-118.
On $a^x - b^y = c$, **2**, (1936-37), 119-122.
Waring's problem—V : on g (6), **2**, (1936-37), 213-214.
A correction to the paper 'On $A^x - B^y = C$', **2**, (1936-37), 215.
On Waring's problem, VIII, **3**, (1938-39), 205-220.
On Waring's problem, IX, **3**, (1938-39), 221-225.
A note on the paper of Sambasiva Rao, **3**, (1938-39), 266-267.
On a congruence property of the divisor function, **6**, (1942), 118-119.
On the divisors of $a^n + 1$, **6**, (1942), 120-121.
On $a^X - b^Y = b^X + a^Y$, **8**, (1944), 10-13.
On the smallest primitive root of a prime, **8**, (1944), 14-17.
On Waring's problem with powers of primes, **8**, (1944), 18-20.
Highly composite numbers of the t-th order, **8**, (1944), 61-74.

Postnikov, A. G. : Generalisation of one of the Hilbert problems, **20**, (1956), 207-216.
On Dirichlet's L-series with the character modulus equal to the power of a prime number, **20**, (1956), 217-226.

Prasad, B. N. and SIDDIQI, J. A. : On the Nörlund summability of the r-th derived Fourier series, **14**, (1950), 159-170.

Racine, C. : On the most general static field in the relativity theory, **2**, (1936-37), 76-90.
Contribution to the relativistic problem of n-bodies, I, **5**, (1941), 156-164.
Contribution to the relativistic problem of n-bodies, II, **5**, (1941), 165-178.
Frullani integrals, **11**, (1947), 95-97.

Rademacher Hans. : On the transformation of log $\eta(\tau)$, **19**, (1955), 25-30.

Rajagopal, C. T. : Convergence theorems for series of positive terms, **3**, (1938-39), 118-125.
Postscript to 'Convergence theorems for series of positive terms', **5**, (1941), 113-116.

On periodic meromorphic functions, **9**, (1945), 69-76.
Cesaro summability of a class of functions, **11**, (1947), 22-27.
On a one-sided Tauberian theorem, **16**, (1952), 47-54.
On a one-sided Tauberian theorem—a further note, **17**, (1953), 33-42.
Theorems on the product of two summability methods with applications, **18**, (1954), 88-105.

Ramamurti, B. : On the osculating spaces of a rational norm curve which cut a linear complex in null variant complexes, **1**, (1934-35), 179-181.
On linear complexes of minimum rank containing all the tangents of a rational norm curve, **3**, (1938-39), 34-40.
And SRINIVASIENGAR, C. N. : The lines of striction of a quadric, **3**, (1938-39), 19-24.
And VAIDYANATHASWAMY, R. : On the rational norm curve, **1**, (1934-35), 199-202.

Raman, P. K. : On a class of linear spaces in function theory, **18**, (1954), 127-130.
Ramanathan, A. : A characterisation of maximal Hausdorff spaces, **11**, (1947), 73-80.
Minimal bicompact spaces, **12**, (1948), 40-46.
On the strong extension of a T_1-space into a T_1-bicompact space, **13**, (1949), 25-30.

Ramanathan, K. G. : Multiplicative arithmetic functions, **7**, (1943), 111-116.
Congruence properties of Ramanujan's function $\tau(n)$ **9**, (1945), 55-59.
On the product of the elements in a finite Abelian Group, **11**, (1947), 44-48.
A note on symplectic complements, **18**, (1954), 115-125.
The Riemann sphere in matric spaces, **19**, (1955), 121-125.
Quadratic forms over involutorial division algebras, **20**, (1956), 227-257.
Ramanujan, M. S. : Series-to-series quasi-Hausdorff transformations, **17**, (1953), 47-53.
Ramaswami, V. : Normed algebras, isomorphism and the associative postulate, **14**, (1950), 47-64.
On a theorem of Gelfand and Hille, **14**, (1950), 129-138.
And SAMBASIVA RAO, K. : On the probability that the k-th power-free integers belonging to an assigned arithmetic progression, should be prime to one another, **9**, (1945), 88-92.

Ram Ballabh : On superposability, **6**, (1942), 33-40.
Steady uniplanar superposable fluid motions, **7**, (1943), 36-41.
On two-dimensional superposable flows, **16**, (1952), 191-197.
Ram Behari : A significant integral invariant in the theory of rectilinear congruences, **1**, (1934-35), 135-142.
Generalisations of the theorems of Maluz-Dupin, Beltrami and Ribaucour, in rectilinear congruences, **2**, (1936-37), 45-50.
Ruled surfaces through a ray of a rectilinear congruence, **2**, (1936-37), 91-95.
A note on Strazzeri's formula in rectilinear congruences, **2**, (1936-37), 163-164.
Infinitesimal deformations of ruled surfaces, **3**, (1938-39), 68-72.

Comparison of Sanni's theory of line congruences with Gauss's theory of surfaces, **3**, (1938-39), 109-113.
A note on Laguerre's function, **3**, (1938-39), 202-204.

Rangachariar, V. : Minimal surfaces with reference to the line of striction of the asymptotic lines, **1**, (1934-35), 203-208.
On the three orthogonal congruences of curves, **2**, (1936-37), 216-219.

Rangaswami, K. : On the pedal quartics of a quadric, **2**, (1936-37), 159-162.
On a net of tetrahedra associated with a space cubic curve, **2**, (1936-37), 255-258.
The theory of the general contact circles of a triangle, **3**, (1938-39), 254-261.
The geometry of Hart tetrads, **6**, (1942), 131-136.

Rankin, R. A. : The construction of automorphic forms from the derivatives of a given form, **20**, (1956), 103-116.

Rao Bhimasena : *See* under BHIMASENA RAO.
Rao, A. Narasinga : *See* under NARASINGA RAO, A.
Rao, K. Sambasiva : *See* under SAMBASIVA RAO, K.
Rao, P. Sambasiva : *See* under SAMBASIVA RAO, P.

Rathie, C. B. : Some infinite integrals involving E-functions, **17**, (1953), 167-175.
Ratnam, P. : The derivatives of an algebraic function, **5**, (1941), 145-147.
Rau, K. Ananda : *See* under ANANDA RAU, K.
Reisner, E. : Remarks on the theory of bending of plates of variable thickness, III, **3**, (1938-39), 200-201.

Roth, K. F. and BAMBAH, R. P. : A note on lattice coverings, **16**, (1952), 7-12.
Rubugunday, R. K. : On g (k) in Waring's problem, **6**, (1942), 192-198.
Sambasiva Rao, K. : On a particular representation of integers as sums of k-th powers, **3**, (1938-39), 262-265.
A correction, **4**, (1940), 125.
On Waring's problem for smaller powers, **5**, (1941), 117-121.
And RAMASWAMI, V. : On the probability that the k-th power-free integers belonging to an assigned arithmetic progression should be prime to one another, **9**, (1945), 88-92.

Sambasiva Rao, P. : On a series of eigenfunctions, **15**, (1951), 140-151.
On eigenfunctions of the membrane problem, **17**, (1953), 1-20.

Sastri, N. Sundara Rama : *See* under SUNDARA RAMA SASTRI, N.
Sastry, S. : On Tarry's problem, **4**, (1940), 161-168.
Satake, Ichiro : On the compactification of the Siegel space, **20**, (1956), 259-281.

Sathe, L. G. : On a congruence property of the divisor function, I, **7**, (1943), 143-146.
On a congruence property of the divisor function, II, **7**, (1943), 147-151.
On a problem of Hardy on the distribution of integrers having a given number of prime factors, I, **17**, (1953), 63-82.

On a problem of Hardy on the distribution of integers having a given number of prime factors, II, **17**, (1953), 83-141.

On a problem of Hardy on the distribution of integers having a given number of prime factors, III, **18**, (1954), 27-42.

On a problem of Hardy on the distribution of integers having a given number of prime factors, IV, **18**, (1954), 43-81.

Seetharaman, V. : Trajectories and lines of force in a Riemannian space, **2**, (1936-37), 280-288.

Segal, I. E. : Invariant measures on locally compact spaces, **13**, (1949), 105-130.

Selberg, A. : Note on a paper by L. G. SATHE, **18**, (1954), 83-87.

Harmonic analysis and discontinuous groups in weakly symmetric Riemannian spaces with applications to Dirichlet's series, **20**, (1956), 47-87.

Sen, R. N. : On pairs of teleparallelisms, **17**, (1953), 21-32.

On pairs of teleparallelisma, II, **19**, (1955), 61-71.

Sen Gupta, B. K. : On the aberrancy curve, **9**, (1945), 77-79.

On the aberrancy curve, **10**, (1946), 33-34.

Seth, B. R. : Stability of rectilinear plates, **10**, (1946), 13-16.

Shabde, N. G. : On some results involving confluent hypergeometric functions, **2**, (1936-37), 167-171.

Identities between field equations in the general field theory of Schouten and Van Dantzig, **2**, (1936-37), 186-197.

On some K_n-function formulae, **2**, (1936-37), 276-279.

On some results involving k_n-functions, **3**, (1938-39), 146-151.

On some series and integrals involving k_n-functions, **3**, (1938-39), 307-311.

On some results involving confluent hypergeometric functions, **4**, (1940), 151-157.

And ZIA-UD-DIN, M. : On some integrals involving Bessel functions, **1**, (1934-35), 119-124.

Shah, S. M. : An inequality for the arithmetical function $g(x)$, **3**, (1938-39), 316-318.

A theorem on integral functions of integral order, **5**, (1941), 179-188.

Note on a theorem of Polya, **5**, (1941), 189-191.

The lower order of the zeros of an integral function, **6**, (1942), 65-68.

A note on the lower order of the integral functions, **9**, (1945), 50-54.

The maximum term of an entire series, II, **9**, (1945), 54-55.

A note on lower proximate orders, **12**, (1948), 31-32.

The maximum term of an entire series, V, **13**, (1949), 60-64.

The maximum term of an entire series, VI, **14**, (1950), 21-28.

Exceptional values of entire and meromorphic functions, **20**, (1956), 315-327.

AND ISHAQ, M. : On the maximum modulus and the coefficients of an entire series, **16**, (1952), 177-182.

Shankar, Hari : *See* under HARI SHANKAR.

Sharma, J. L. : On integrals involving Lame functions, **2**, (1936-37), 125-130.

Shastri, N. A. : On the expansion of Bessel functions in a series of Mathieu functions and on a property of Mathieu functions, **1**, (1934-35), 29-40.

Some integral representations of the k-function, **1**, (1934-35), 129-132.
Operational methods and the k-function, **1**, (1934-35), 155-164.
On simultaneous operational calculus, **1**, (1934-35), 235-240.
On some results involving Bateman's function, **3**, (1938-39), 8-18.
Integral relations between the k-function with non-integral index and confluent hypergeometric functions, **3**, (1938-39), 152-154.
Relations between some confluent hypergeometric functions, **3**, (1938-39), 155-163.

Shastry, R. V. and MEHRHOTRA, B. M. : A few self-reciprocal functions, **2**, (1936-37), 220-221.
And BRIJ MOHAN. : An inversion formula, **3**, (1938-39), 46-48.

Shukla, R. : A system for general set theory, **12**, (1948), 121-124.

Shukrey, S. S. : On integral equation associated with parabolic cylinder functions, **1**, (1934-35), 45-52.

Sheffer, I. M. : The derivatives of certain functions, **16**, (1952), 83-97.

Siddiqi, J. A. and PRASAD, B. N. : On the Nörlund summability of the r-th derived Fourier series, **14**, (1950), 159-170.

Siddiqi, M. R. : Boundary problems in non-linear parabolic equations, **1**, (1934-35), 125-128.

Siegel, Carl Ludwig. : A generalisation of the Esptein zeta-function, **20**, (1956), 1-10.

Siez, Ching-Syur. : A general expression for Euler's ϕ function, **8**, (1944), 91-94.

Singbal, B. V. : Algebraic basis of Morse's vibrational theory, **18**, (1954) 131-165.

Singh, B. and **Chariar, V. R.** : On a certain rectilinear congruence, **13**, (1949) 148-151.

Sinha, Miss S. : A few infinite integrals, **6**, (1942), 103-104.
Infinite integrals involving Bessel functions of imaginary argument, **8**, (1944), 21-26.

Srinivasan, T. K. : Some properties of distance functions, **11**, (1947), 38-43.

Srinivasan, T. P. : On measurable sets, **18**, (1954), 1-8.
On extensions of measures, **19**, (1955), 31-60.

Srinivasiengar, C. N. : Asymptotic curves of the cubic and quartic scrolls, **1**, (1934-35), 252-258.
A note on harmonic curves, **2**, (1936-37), 302-307.
On the zeros of Weierstrass's non-differentiable function, **3**, (1938-39), 114-117.
The linear line-congruence, **5**, (1941), 73-91.
On the quartic developable, **6**, (1942), 127-130.
And RAMAMURTI B. : The lines of striction on a quadric, **3**, (1938-39), 19-24.

Stone, M. H. : On a theorem of Polya, **12**, (1948), 1-7.
On unbounded operators in Hilbert space, **15**, (1951), 155-192.

Subba Rao, M. V. : On generalised Legendre polynomials, **7**, (1943), 96-101.
RAMANUJAN's trigonometrical sum and relative partitions, **15**, (1951), 57-64.

Sundara Rama Sastri, N. : The range of samples taken from a rectangular population, **1**, (1934-35), 228-234.

Suryanarayanan, K. S. : Composite meromorphic functions, **1**, (1934-35), 241-246.

On three rational functions on a Riemann surface, **3**, (1938-39), 56-67.

Szasz, O. : On the relative extrema of the Hermite orthogonal functions, **15**, (1951), 129-134.

Szekeres, G. : A note on the volume of the unitary symmetrical space, **19**, (1955), 127-132.

Tchudakoff, N. G. : Theory of the characters of number semigroups, **20**, (1956) 11-15.

Thron, W. J. and COWLING, V. F. : Zero-free regions of polynomials, **20**, (1956), 307-310.

Transue, W. and MORSE, M. : A calculus for Frechet variations, **14**, (1950), 65-117.

Turan, Paul. : On the strong summability of Fourier series, **12**, (1948), 8-12.

A note on Fermat's conjecture, **15**, (1951), 47-50.

On the zero of the zeta-function of Riemann, **20**, (1956), 17-36.

Vaidyanathaswamy, R. : The theory of the pedal line, **1**, (1934-35), 143-154.

An extension of the determinant concept based on group characters, **1**, (1934-35), 186-198.

On the affine classification of quadric loci, **1**, (1934-35), 259-265.

A note on the Morley-Peterson theorem, **2**, (1936-37), 144-146.

The algebra of quadratic residues, **2**, (1936-37), 239-249.

On the group operations of a Boolean algebra, **2**, (1936-37), 250-254.

And RAMAMURTI, B. : On the rational norm curve, **1**, (1934-35), 199-202.

And VENKATARAYUDU, T. : Canonical basis for ideals in a polynomial domain over a commutative ring with finite basis for ideals, **3**, (1938-39), 49-53.

Varma, R. S. : On a certain polynomial analoguous to Lommel's polynomial, **1**, (1934-35), 115-118.

Extension of some self-reciprocal functions, **2**, (1936-37), 269-275.

Some infinite integrals involving Weber's parabolic cylinder functions, **3**, (1938-39), 25-33.

On Laguerre's polynominals which are self-reciprocal in the Hankel transform, **3**, (1938-39), 54-55.

Some infinite series involving Sonine's polynomial, **3**, (1938-39), 330-333.

Venkatachaliengar, K. : Generalisation of Jacobi's θ function formulae, **1**, (1934-35), 23-28.

On the reducibility of the general elliptic integral into logarithms, **1**, (1934-35), 59-65.

Venkatarama Ayyar, M. and BHIMASENA RAO, M. : Types of solutions of $x^3+y^3+z^3=1$ in integers, **4**, (1940), 47-70.

Venkataraman, B. R. : On a new chain of theorems in circle geometry, **5**, (1941), 38-43.

Venkataraman, C. S. : On some remarkable types of multiplicative functions, **10**, (1946), 1-12.

Further applications of the identical equation to Ramanujan's sum $C_M(N)$ and the function $\rho(M, N)$, **10**, (1946), 57-61.

The ordinal correspondence and certain classes of multiplicative functions of two arguments, **10**, (1946), 81-101.

Classification of multiplicative functions of two arguments based on the identical equation, **13**, (1949), 17-22.

On van Sterneck-Ramanujan function, **13**, (1949), 65-72.

Venkataraman, M. : Chain theorems in geometry : Cox-Grace type, **9**, (1945), 1-28.

A new proof of the centre circle chain, **10**, (1946), 65-67.

Venkatarayudu, T. : On the significance and the extension of the Chinese reminder theorem, **2**, (1936-37), 99-110.

Multiplicative arithmetic functions, connected with a finite Abelian group, **2**, (1936-37), 259-264.

On the automorphisms of the vector ring mod $(M_1 M_2 \ldots M_n)$, **2**, (1936-37), 295-301.

The algebra of the e-th power residues, **3**, (1938-39), 73-81.

The characters of the classes $(n\text{-}k, k)$ of the symmetric group of degree n, **7**, (1943), 42-45.

And VAIDYANATHASWAMY, R. : Canonical basis for ideals, in a polynomial domain over a commutative ring with finite basis for ideals, **3**, (1938-39), 49-53.

Vijayaraghavan, T. : On two problems relating to linear connected topological spaces, **11**, (1947), 28-30.

A power series that converges and diverges at every where dense sets of points on its circle of convergence, **11**, (1947), 69-72.

On the fractional parts of powers of a number, IV, **12**, (1948), 33-39.

On a problem in elementary number theory, **15**, (1951), 51-56.

And CHOWLA, S. D. : On the largest prime divisor of numbers, **11**, (1947), 31-37.

And MASANI, P. : An analogue of Laurent's theorem for a simply connected region, **16**, (1952), 25-30.

Viswanatham, B. : On the existence of a solution of an infinite differential system, **16**, (1952), 13-24.

Wang, Hsien-Chung. : On the projective deformation of a family of elements of contact, **7**, (1943), 51-57.

Widder, D. V. : Symbolic inversions of the Fourier sine transform and of related transforms, **14**, (1950), 119-128.

Yano, K. : On groups of homothetic transformations in Riemannian spaces, **15**, (1951), 105-117.

Zia-ud-Din, M. : On some relations in Mathieu functions, **1**, (1934-35), 182-185.

On some thoerems concerning determinantal symmetric functions, **2**, (1936-37), 265-268.

And SHABDE, N. G. : On some integrals involving Bessel functions, **1**, (1934-35), 119-124.
